control**

Dr.Coffee RB Zone

Fully Automatic Commercial Coffee Machine

The Dr.Coffee RB Zone is a high-tech, super-automatic machine that packs exceptional performance into a compact footprint. It delivers a broad range of rich, nuanced flavors while fitting seamlessly into convenience stores, office kitchens, meeting rooms, and even vending kiosks. Sophisticated design meets smart engineering – wherever you place it, it looks and works the part.

Key Features

10.1" Anti-Fingerprint Touchscreen

A large, intuitive display that does more than just control the machine – it can also run promotional visuals. The Retina-grade, smudge-resistant screen makes operation smooth and pleasant.

Ceramic Burr Grinders

Unlike metal burrs, ceramic burrs stay cool during grinding. That means no burnt flavors, no grind inconsistency, and no compromised taste – just pure, aromatic coffee, cup after cup.

More Features

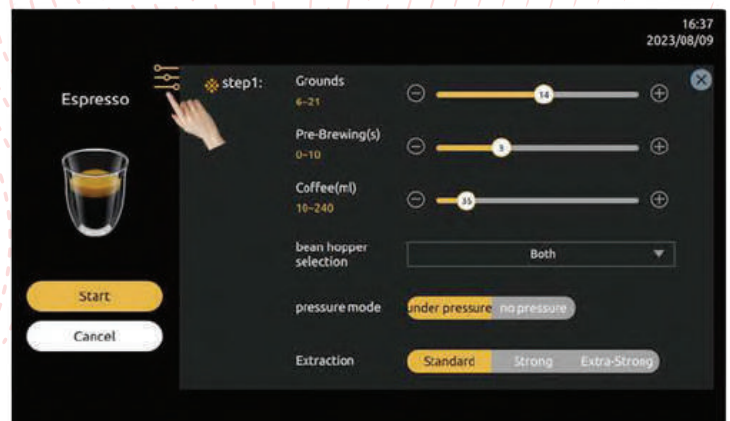

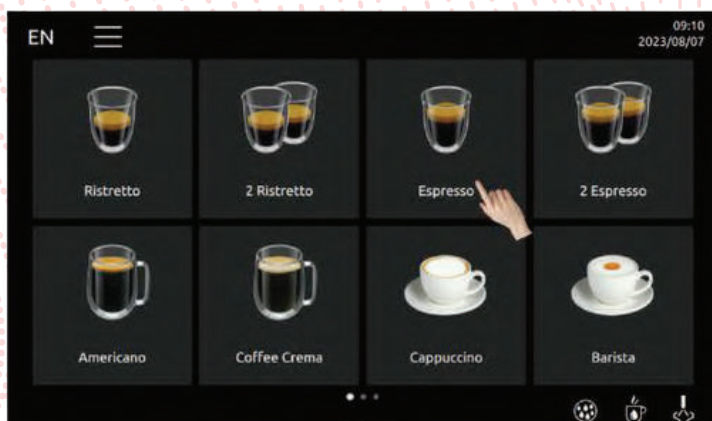

Sturdy Metal Housing

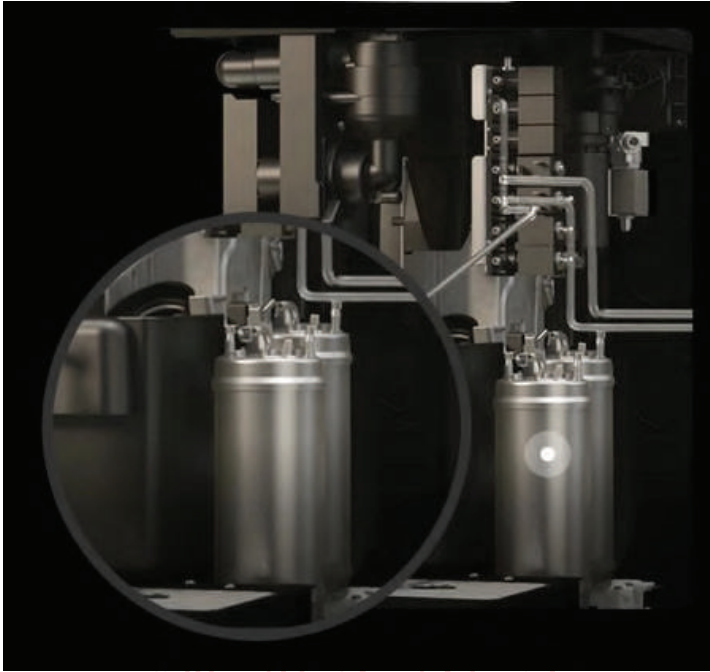

Built for durability and reliability, with a premium look that inspires confidence.

Customizable Drink Profiles

For cocoa and other specialty drinks, you can fine-tune coffee dose, pre-infusion time, and final volume to match your exact preferences.

Fast & Productive

Dual Boilers

Separate boilers for hot water and steam – a proven design that boosts output speed, ensures consistent drink quality, and extends the machine's service life.

21g Metal Brewing Unit

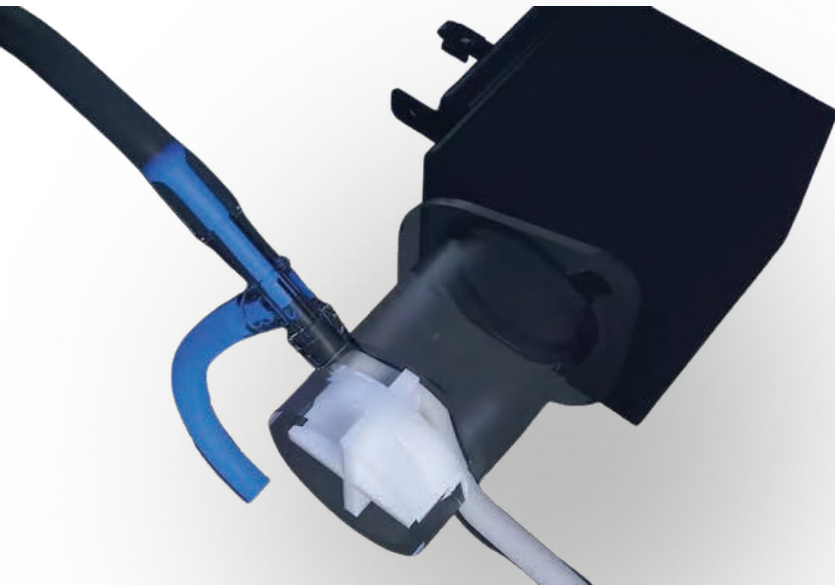

Metal brew groups are the gold standard for precision and toughness. Rated for 300,000 cycles – and often outlasting that – the 21g chamber handles practically any drink size you throw at it.

Water Supply Options

Choose what suits your setup:

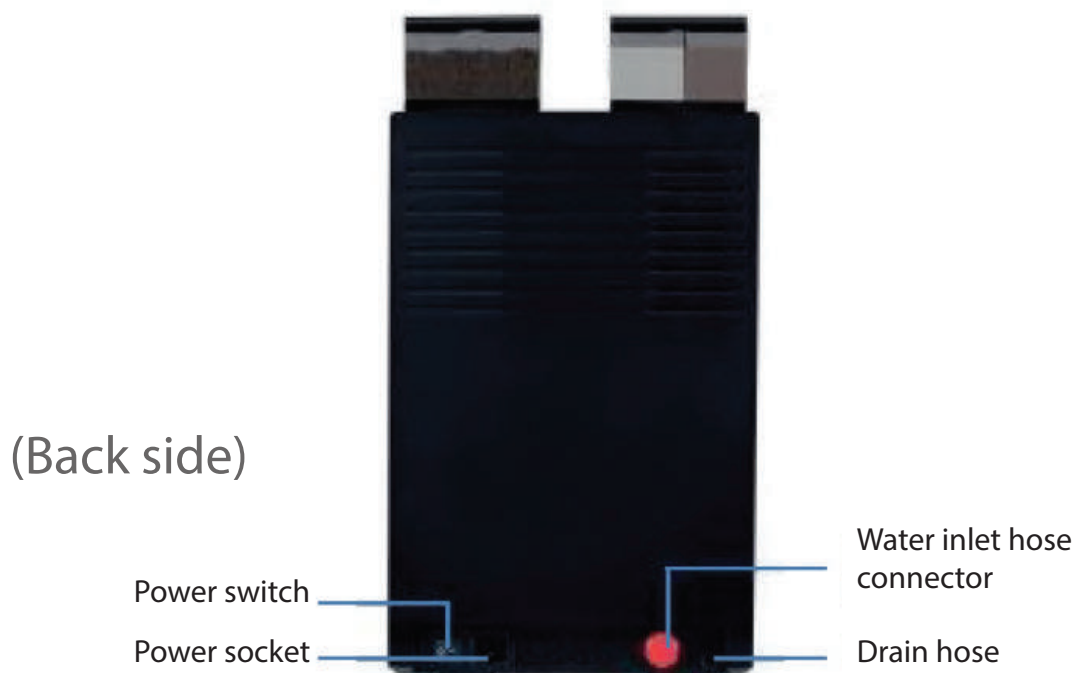

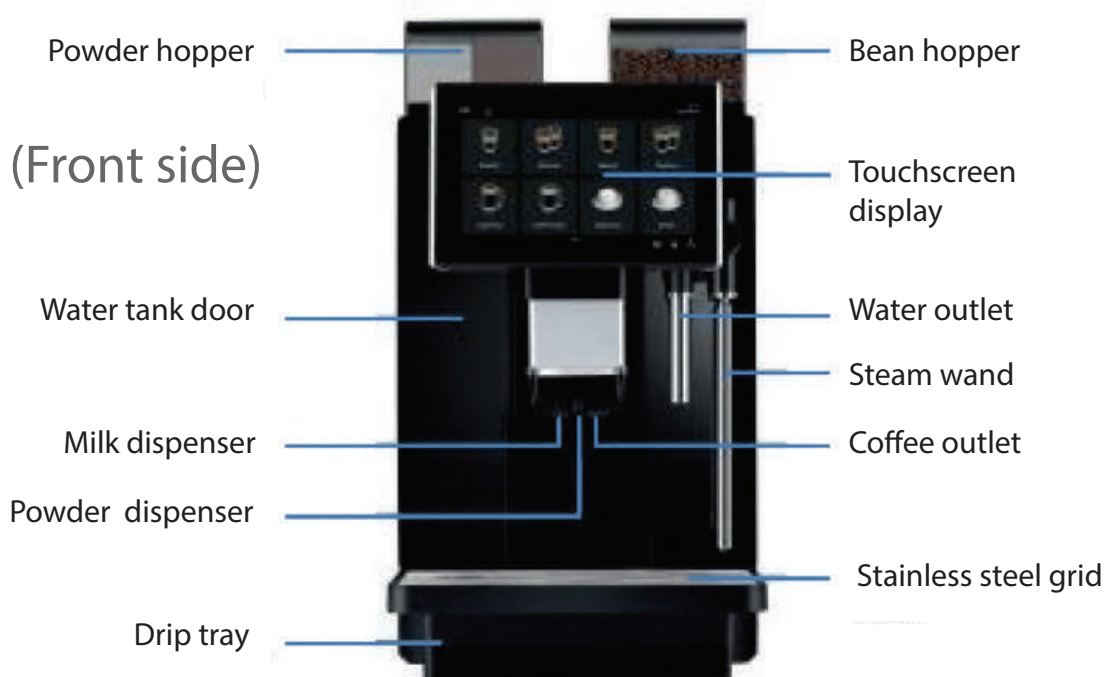

- 1) Built-in 4L tank
- 2) Direct connection to a 19L bottled water supply
- 3) Plumbed directly into the main water supply

Self-Cleaning System

The milk and coffee circuits auto-clean every time the machine powers on or off. You can also tailor cleaning parameters to your usage – maintenance has never been more hands-off.

Product Overview

Technical Specifications

Capacity		RB Zone series	
		RB Zone -T	RB Zone -H
Recommended daily output		200 cups	
Hourly output	Espresso (50ml)	100 cups	
	Americano (210ml)	80 cups	
	Cappuccino (200ml)	80 cups	
Hot water output (per hour)		30L	
Water tank capacity		4L	
Bean hopper capacity		1500g	
Powder hopper capacity		Left powder hopper 1L Right powder hopper 1.2L	
Waste container capacity		~70 pucks (10g each)	
Drip tray volume		1.5L	

Technical Data	RB Zone
Voltage	220V ~ 50Hz
Power	2700W
Connection hose	G3/4' replaced with reinforced G1/2' hose, 1.5m
Max water pressure	0.6 MPa
Dimensions (W×D×H)	340 × 545 × 620 mm
Weight	26 kg

Accessories

Item	Pic	RB Zone -series	
		RB Zone -T	RB Zone -H
Power cable		x1	x1
Grinder adjustment key		x1	x1
Milk tube		x1	x1
